Career Objective

Full Stack Developer with 6+ years of experience building mission-critical web applications, specializing in TypeScript, Laravel, React, and Python. Committed to delivering high-performance, optimized, and scalable solutions, with a deep focus on creating seamless, pixel-perfect UI/UX experiences. Proven ability to design and implement complex systems, including a staff access control platform for Nigeria's largest airport and a microservices-based solution for a leading radiology center. Strong expertise in cloud architecture and DevOps, looking to bring technical excellence and problem-solving skills to a senior development role where challenging projects and impactful solutions take priority.

Key Skills

Programming Languages

- **JavaScript/TypeScript** with extensive experience in modern ES6+ features and async programming
- **PHP** with deep knowledge of OOP principles and design patterns
- **Python** for backend development and automation
- **HTML5/CSS3** including responsive design and CSS frameworks

Databases

- **Relational:** MySQL, PostgreSQL with expertise in query optimization and database design
- **NoSQL:** MongoDB, Redis
- **Query Languages:** SQL

Frameworks & Libraries

- **Backend:** Rust, Elixir (Phoenix), Laravel, Django, CodeIgniter, Javascript
- **Frontend:** React, Next.js, Vue.js
- **Mobile:** React Native

DevOps & Cloud

- **Version Control:** Git (GitHub, GitLab, Bitbucket)
- **Cloud Platforms:** AWS, Google Cloud Platform, Azure
- **Operating Systems:** Linux, Windows

Professional Skills

- Strong written and verbal communication
 - Problem-solving and analytical thinking
 - Team collaboration and project management
-

Professional Experience

Agroease | Mobile Developer and Deputy CTO *Previous Role*

- Leading mobile development using React Native for cross-platform e-commerce application
- Implemented secure payment gateway integrations with Paystack and Flutterwave
- Developed offline-first architecture for reliable operation in areas with poor connectivity

- Created intuitive UI/UX for farmer inventory management system
- Built real-time order tracking and push notification system
- Optimized image loading and caching for improved app performance
- Implemented biometric authentication for enhanced security
- Established CI/CD pipeline using Fastlane for automated app deployment
- Developed reusable component library to maintain consistent design system

Peniwallet | Backend & DevOps Engineer *Previous Role*

- Developed scalable backend infrastructure using TypeScript and Node.js
- Implemented microservices architecture for improved system modularity
- Set up and managed comprehensive CI/CD pipelines
- Orchestrated containerized deployments using Docker and Kubernetes
- Optimized database performance and implemented caching strategies
- Established monitoring and logging systems for production environment
- Developed automated testing frameworks for ensuring code quality

Flyte Technologies | Full Stack Web Developer *Previous Role*

- Improved and enhanced electronic management reporting system functionality using React + Redux frontend and Laravel backend
- Implemented robust user authentication and reporting features to boost system efficiency
- Managed and optimized Linux server infrastructure
- Conducted system maintenance and performance optimization
- Integrated complex data visualization features for management reporting
- Implemented responsive design principles for better user experience
- Established automated deployment workflows for continuous integration

SMC DAO | Full Stack Developer *Previous Role*

- Developed comprehensive e-commerce solution using Laravel for admin backend
- Built RESTful API endpoints for seamless frontend integration
- Led frontend development using Next.js, Tailwind CSS, and TypeScript
- Implemented web3 payment integration systems
- Optimized application performance and database queries
- Established secure authentication and authorization systems
- Collaborated with design team to implement modern UI/UX features

Xcel Radiology | Backend Developer and DevOps Engineer *Previous Role*

- Architected and implemented microservices using Python Django and PostgreSQL
- Set up and managed Azure Pipelines for continuous deployment
- Orchestrated Docker containers for efficient deployment
- Implemented scalable database architecture
- Established automated testing and monitoring systems
- Optimized application performance for handling medical data

- Integrated secure file storage and retrieval systems

Federal Airport Authority of Nigeria | Backend Developer *Previous Role*

- Developed Staff Access Control System for MMIA using Laravel
 - Implemented QR code scanning authentication system
 - Created secure door access control mechanisms
 - Designed and optimized database architecture
 - Built real-time monitoring dashboard
 - Integrated with existing security infrastructure
 - Implemented comprehensive logging and reporting features
-

Education

Federal University Lokoja | Lokoja, Kogi State | August 2024
Bachelor of Science in Computer Science
